The dinner nextdoor

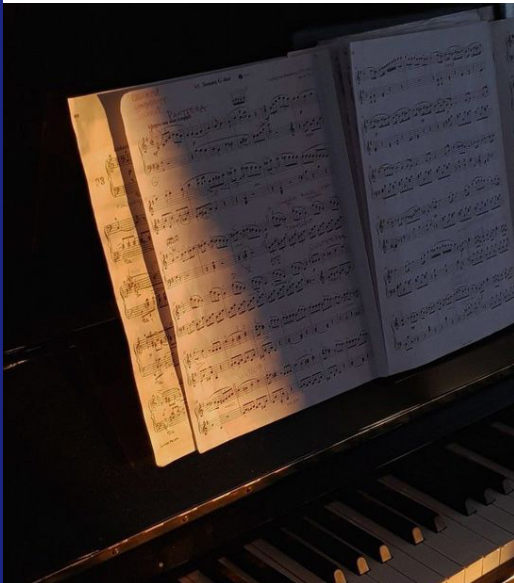

The dinner next door

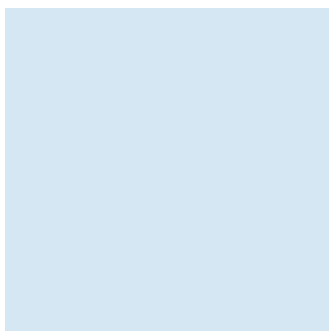

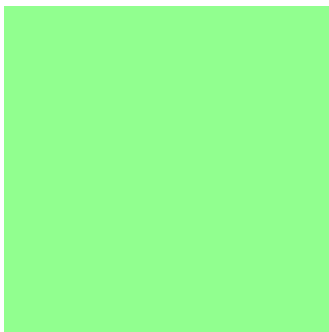

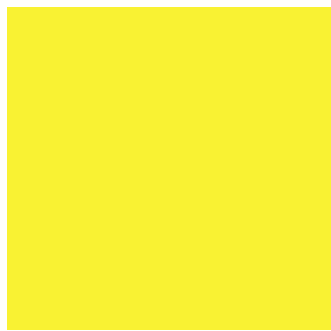

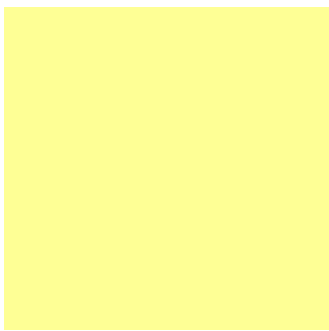

‘Better a good neighbour than a distant friend.’

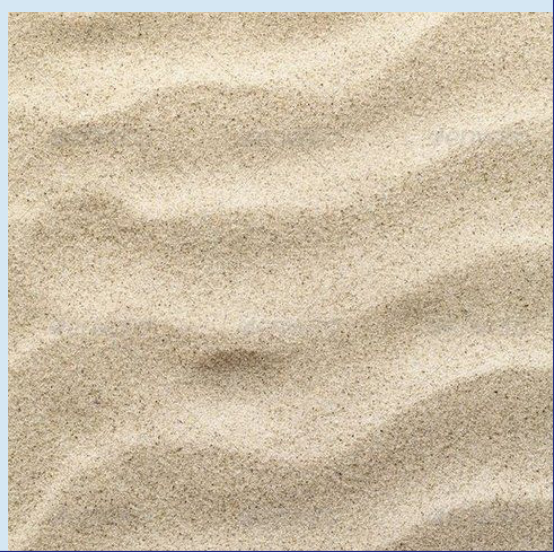

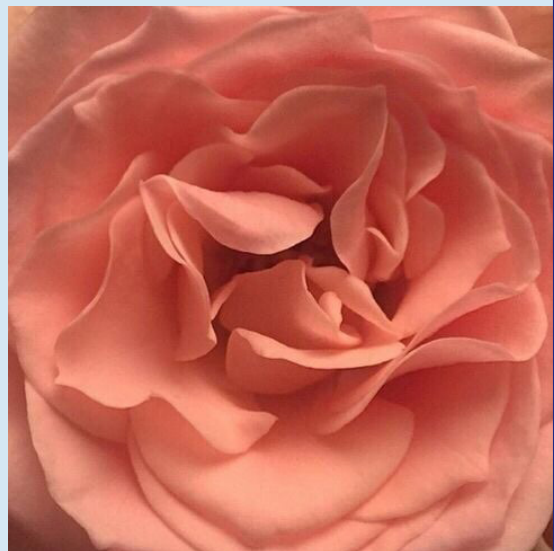

Finally! We can leave the house again and get dressed well. It’s so important to feel free and have no limits about where to go. The warmth and cosiness from each other is what we desperately desired. And now we can! So we have to enjoy that to the fullest. The whole day and evening with our friends and family on one big tafel. After dining and a little too much wine we all sing and dance around the table with the music that relates us. This weird period of time had bring us more together and let us think more about the real important things in life. The close friendships and good neighbours to live next to. You don’t always have to be as far as possible from home to have a good time. We have so many beautiful countries around us and Europe has so much to offer. We want to celebrate life with our European neighbours. Europe had everything you can imagine. It has so many lovely places.

The perfect summer evening! A dinner with our European neighbours and all the people that we love. We can be seen again and that feeling is countless. We can look to ourselves in the mirror and be proud. Show yourself with colour, dresses, bows, statement jewelry, heels and everything you can think of. Let’s go crazy! We celebrate with flowers, because they present love and gratitude. We also love gold, because they represent warmth and wealth in friendships and family. Traditional prints in service, interior, accessories and clothing, because we keep it close to home, but we feel more free, grateful and happy than ever!
